

## Quality Training and Consultancy Services

### About us and our services

Icanthus is the new image of an established provider of training and consultancy services. During the past thirteen years, we have trained many hundreds of course participants, from top management to process operators. Our services cover the subject areas of Quality, Continual Improvement, Environment and Health & Safety.

### In-house delivery

Recognising the increasing popularity of in-company training programmes, Icanthus specialises in providing customised courses delivered on your premises, or, if required, at a nominated venue. In the event that only a small number of your personnel require training, we may be able to offer a flexible package which will enable this to be economically viable – please discuss your requirements with us.

### Why us?

Typically, our clients experience multiple benefits with our in-house training programmes, including:

**Convenience:** Less course administration and organisation; flexible course duration and delivery patterns. We bring the course to you!

**Effectiveness:** Course content and materials customised to suit your business needs, and the current knowledge of your people.

**Value:** Our pricing structure provides you with an opportunity to train a number of your people at a fraction of typical public course fees.

**Professional:** Qualified and experienced course tutors and consultants.

**High Quality Materials:** Each course participant receives a comprehensive set of course notes which are a valuable source for future reference, long after the training has finished.

**Certificate of Training:** Each course participant receives a course certificate.
